

BADGERDESIGN

Print Guidelines

Print Method: **Offset Litho**

If you are happy to proceed on the basis of this proof, please accept the job via the link on the email. Or likewise please add any amendments you needed via the link.

It's important that you carefully check all spelling and graphic content against your original, as artwork can sometimes change due to different computer systems.

Please also be aware that printed colours will vary to those on your computer monitor as offset litho uses the four process colours - CMYK - therefore no responsibility can be held for the finished print being different to your computer screen or personal printer.

Need a physical proof?

Digital printed proofs are available which are printed on a machine that's calibrated to the litho press so if you'd prefer to see a digital colour proof, please reply quoting Job Number and stating 'Digital printed proof required'.

It's worth noting that image quality issues may become more apparent at the printed proof stage – e.g low resolution of graphics or photo's etc.

**Please call Lee on 01392 662107 or
email artwork@badgerdesign.com to discuss any artwork queries.**
